

Infection Prevention & Control

Boot Camp for Long-Term Care Facility Infection Preventionists

Vol MMXVI, No. 2

Day 2 - Friday, December 2, 2016

\$1.25

Antibiotic Stewardship Program

Dolly Greene

(ASP)

Handouts
[Click here for handouts](#)

At the conclusion of this presentation, participants will be able to:

- Describe the evolution of multi-drug resistant micro-organisms (MDROs)
- Understand of the significance of appropriate use of laboratory testing
- Discuss over-utilization of antibiotics in the post-acute care setting
- Explain the rationale for optimization of antibiotic usage
- List the 7 Core Elements of Antibiotic Stewardship Program (ASP) for long-term care facilities
- Discuss the role of the Infection Preventionist in an Antibiotic Stewardship Program

Rapid Fire Sessions

Dolly Greene & Nancy Parris

Communication & QAPI

At the conclusion of this presentation, participants will be able to:

- Understand the role of the IP as an Interdisciplinary Communicator
- Describe what "SBAR" stands for
- Discuss one example of using SBAR
- Describe what "STOPANDWATCH" stands for
- Discuss one example of using STOPANDWATCH
- Demonstrate the use of the "Five Whys" in a Quality Assessment & Performance Improvement exercise
- Utilize the fishbone diagram to identify cause and effect relationships of a problem

Handouts

Putting It All Together

Dolly Greene & Nancy Parris

At the conclusion of this presentation, participants will be able to:

- Review SBAR
- Review Five Whys
- Define the Quality Star Program

Handouts
[Click here for handouts](#)

Outbreak Management

Nancy Parris

At the conclusion of this presentation, participants will be able to:

- Define "epidemic"
- Describe the steps in managing and outbreak or cluster in a long-term care facility

Handouts

Sometimes I wish I could spread my happiness and joy onto others, as easily as germs are spread.

- anonymous

Infection Prevention for Employees

Dolly Greene & Nancy Parris

At the conclusion of this presentation, participants will be able to:

- Review essential activities of employee health programs relating to infection prevention and control
- Identify three common infectious diseases important to an effective Employee Health program
- Understand laboratory testing for tuberculosis (TB) screening
- Discuss the components of a Bloodborne Pathogen (BBP) exposure control plan
- Describe precautions for prevention of contracting bloodborne diseases and tuberculosis
- Discuss the importance of immunizations for employees
- Describe steps taken in an employee infectious disease exposure follow-up
- Understand when employee work restrictions should be implemented

Handouts
[Click here for handouts](#)

The Environment

Nancy Parris

Handouts
[Click here for handouts](#)

At the conclusion of this presentation, participants will be able to:

- Understand the role the environment plays in infection prevention
- Discuss the IP's role in conducting Environmental Rounds
- Explain the differences between cleaning and disinfection terminology and practices
- Describe which environmental surfaces are considered "high touch"
- Explain how to administer an effective environmental sanitation services (EVS) program
- Discuss the role of the environment in transmission of healthcare-associated infections (HAI)
- Review management of biohazardous/infectious waste
- Discuss proper handling of linen

Common Infectious Diseases

Dolly Greene

What's Bugging Your Facility

At the conclusion of this presentation, participants will be able to:

- Identify three common infectious diseases seen in long-term care facilities
- Identify a strategy for each infectious disease to prevent transmission
